Subject: Direct Revenue Settlement

Gentlemen:

1.5 million Dollars? Not even CLOSE!

Spyware, Spam, Pop-up/Pop-under porn gateways, are virtual assaults on personal property, and should be addressed with considerably more punishment to deter future offerings from the same or different people.

It's unconscionable that our legal system will confirm complaints of trespass and invasive activity and allow the criminal protagonists to keep the financial gains.

Considering the 'real' pain and suffering shouldered by rank & file computer users, not only should these persons be jailed, any financial gain, should be returned to the class of victims.

It seems that our legal system is far behind in the game of computer technology. Sadly.
